Multiple Disease Prediction System

What is Frontend and Backend ?

Frontend :

The front end is the part of the website users can see and interact with such as the graphical user interface (GUI) and the command line including the design, navigating menus, texts, images, videos, etc.

Frontend Languages :

- HTML
- JavaScript
- CSS

Backend :

The backend is the part of the website users cannot see and interact with. Everything that happens in the background can be attributed to the backend.

Backend Languages :

- PHP
- C++
- Java
- Python
